About Me

I am an adaptable and solutions-driven Full-Stack Web Developer with a strong foundation in Informatics and a passion for delivering scalable digital solutions. Through my experiences across the government and healthcare sectors, I have successfully developed complex management systems, such as an Electronic Medical Records (EMR) platform and an office guard monitoring application, that significantly improved administrative efficiency and streamlined internal operations. To achieve these results, I utilized robust technical skills in backend engineering with Laravel and MySQL, alongside modern frontend ecosystems including Next.js, React, TypeScript, and Tailwind CSS. Combining a commitment to writing clean, maintainable code with a deep understanding of software architecture, I am well-equipped to build high-performance user interfaces and contribute substantial value to your technical initiatives.

Education

Diponegoro University

Aug 2021 – Aug 2025

Bachelor of Informatics

GPA: 3.14 / 4.00

Research Thesis: Development of a Web-Based Electronic Medical Record Management System Application Using the ICONIX Process Method (Case Study at Delima Midwife Independent Practice)

Working Experiences

Web Developer Intern, Independent Midwife Practice (Bidan Delima)

Apr 2025 – Aug 2025

- Developed a web-based application to facilitate patient management and Electronic Medical Records (EMR).
- Assisted in managing and digitizing patient data to improve administrative efficiency.
- The system was developed using the Laravel framework and MySQL database, with key features including patient data management, medical record entry, prescription and billing generation, and multi-format report printing.

Software Engineer Intern, Ministry of Investment BKPM

Jan 2024 – Feb 2024

- Built a web-based application for office guard management to improve the efficiency of personnel monitoring.
- Implemented the solution using Laravel technology to streamline internal office operations.
- Office Sentry is a comprehensive management system designed to enhance the operational efficiency of office boys within an organization.

Project Experiences

School Management System, SMK Al-Musyaffa

Jan 2026 – Mar 2026

- Developed a comprehensive school management web application using Laravel 12 (PHP 8.2), implementing secure role-based access control for administrators, teachers, and finance personnel.
- Engineered a real-time student attendance tracking module integrated with physical barcode scanners, streamlining daily check-ins and preventing manual administrative errors.
- Integrated bulk data processing (Maatwebsite Excel) and automated report generation (DomPDF), streamlining student attendance and financial recapitulations for hundreds of students.
- Implemented a comprehensive system audit trail (Activity Logging) to track administrator and user actions across the platform, ensuring data integrity, security, and accountability.

Automotive E-Commerce & Service Portal, CV Satya Perkasa Mobilindo

Mar 2026 - now

- Developed an integrated automotive e-commerce and booking web application utilizing Laravel 13 (PHP 8.3), facilitating online vehicle sales, trade-ins (tukar tambah), and credit applications.
- Engineered a comprehensive digital service workflow allowing users to seamlessly schedule test drives, book maintenance services, and request document extensions (Samsat tax renewals), elevating the digital customer experience.
- Implemented a secure administrative system with role-based access control, streamlining the management of product inventory, customer transactions, service bookings, and dynamic homepage content.
- Designed and optimized a fast, responsive user interface using Tailwind CSS, Vite, and Blade templates, featuring a custom Content Management System (CMS) module for admins to update landing page promotional sections dynamically.

- Creative Agency Website, [Noiia Studio](#)Jan 2026
- Developed a modern, highly responsive creative agency landing page using Next.js 16 (React 19) and Tailwind CSS, focusing on premium dark-mode aesthetics and seamless user experience.
 - Engineered an interactive service catalog featuring a dynamic modal system to showcase various photography packages (Pre-Wedding, Graduation, Studio Rental), directly integrated with automated WhatsApp booking links to increase customer conversion rates.
 - Designed a modular and scalable UI architecture with reusable components and TypeScript, ensuring cross-platform responsiveness and simplifying the future expansion of portfolio galleries and service offerings.

- Nihloh Coffee & Eatery Web Application, [Nihloh Cafe](#)Des 2025
- Developed a modern and high-performance landing page web application using Next.js (React 19) and Tailwind CSS 4, establishing a strong digital brand presence for a local F&B business.
 - Engineered interactive and modular UI components, including a dynamic "Best Seller" showcase and an immersive image gallery, utilizing React state management to enhance user engagement significantly.
 - Implemented a custom responsive modal system for comprehensive menu viewing, prioritizing cross-device accessibility and a seamless user experience without relying on heavy external UI libraries.

Additional Information

Technical Skills : Laravel, Node.js, React.js, Next.js, Tailwind CSS, Bootstrap, GitHub, Rest API, MySQL, PostgreSQL, Figma, TypeScript, HTML, CSS, JavaScript, PHP.

Soft Skills : Problem Solving, Analytical Thinking, Attention to Detail, Adaptability & Fast Learner, Requirements Translation, Teamwork.

- Certification
1. Belajar Pengembangan Aplikasi Android Intermediate, Dicoding

2. Oracle Primavera P6 Professional Project, Oracle Academy

3. Memulai Dasar Pemrograman untuk Menjadi Pengembang Software, Dicoding

4. Database Programming with SQL, Oracle Academy

5. PL/SQL Database Programming, Oracle Academy

6. UI / UX Design with Figma: Build E-Wallet Apps, BuildWithAngga

7. Diponegoro Big Data School, Diponegoro University
- Jun 2024
