About Me

I am an adaptable and solutions-driven Full-Stack Web Developer with a strong foundation in Informatics and a passion for delivering scalable digital solutions. Through my experiences across the government and healthcare sectors, I have successfully developed complex management systems, such as an Electronic Medical Records (EMR) platform and an office guard monitoring application, that significantly improved administrative efficiency and streamlined internal operations. To achieve these results, I utilized robust technical skills in backend engineering with Laravel and MySQL, alongside modern frontend ecosystems including Next.js, React, TypeScript, and Tailwind CSS. Combining a commitment to writing clean, maintainable code with a deep understanding of software architecture, I am well-equipped to build high-performance user interfaces and contribute substantial value to your technical initiatives.

Education

Diponegoro University

Aug 2021 – Aug 2025

Bachelor of Informatics

GPA: 3.14 / 4.00

Research Thesis: Development of a Web-Based Electronic Medical Record Management System Application Using the ICONIX Process Method (Case Study at Delima Midwife Independent Practice)

Working Experiences

Web Developer Intern, Independent Midwife Practice (Bidan Delima)

Apr 2025 – Aug 2025

- Developed a web-based application to facilitate patient management and Electronic Medical Records (EMR).
- Assisted in managing and digitizing patient data to improve administrative efficiency.
- The system was developed using the Laravel framework and MySQL database, with key features including patient data management, medical record entry, prescription and billing generation, and multi-format report printing.

Software Engineer Intern, Ministry of Investment BKPM

Jan 2024 – Feb 2024

- Built a web-based application for office guard management to improve the efficiency of personnel monitoring.
- Implemented the solution using Laravel technology to streamline internal office operations.
- Office Sentry is a comprehensive management system designed to enhance the operational efficiency of office boys within an organization.

Project Experiences

School Management System, SMK Al-Musyaffa

Jan 2026 – Mar 2026

- Developed a comprehensive school management web application using Laravel 12 (PHP 8.2), implementing secure role-based access control for administrators, teachers, and finance personnel.
- Engineered a real-time student attendance tracking module integrated with physical barcode scanners, streamlining daily check-ins and preventing manual administrative errors.
- Integrated bulk data processing (Maatwebsite Excel) and automated report generation (DomPDF), streamlining student attendance and financial recapitulations for hundreds of students.
- Implemented a comprehensive system audit trail (Activity Logging) to track administrator and user actions across the platform, ensuring data integrity, security, and accountability.

Automotive E-Commerce & Service Portal, CV Satya Perkasa Mobilindo

Mar 2026 - now

- Built a comprehensive automotive e-commerce platform using Laravel 13 (PHP 8.3) to manage complex backend logic for vehicle sales, trade-ins, and digital service workflows.
- Designed and optimized a fast, responsive frontend using Tailwind CSS, Vite, and Blade templates, featuring a custom CMS for admins to update landing page content.
- Integrated the Midtrans payment gateway to securely process booking fees, engineering reliable API webhooks to handle real-time payment callbacks and automated updates.
- Constructed secure internal APIs and an administrative dashboard with Role-Based Access Control (RBAC), streamlining the management of inventory, customers, and service schedules.

- Turkish Restaurant Landing Page Web Application, [Kardesler Uygur Mutfağı](#)May 2026 - now
- Developed a high-performance web application using Next.js 16 and Tailwind CSS v4, featuring immersive, scroll-triggered animations via Framer Motion to elevate brand storytelling.
 - Architected a robust headless CMS infrastructure with Sanity, designing flexible relational schemas that empower the client to seamlessly manage multimedia content and dynamic menus.
 - Implemented an optimized data fetching pipeline utilizing GROQ queries and Next.js ISR, integrating a smart fallback mechanism to guarantee system reliability and ultra-fast load times.
 - Automated SEO and performance optimization by configuring dynamic sitemap.xml and robots.txt generation, alongside structured metadata to maximize local search engine visibility.

Additional Information

Technical Skills	: Laravel, Node.js, React.js, Next.js, Tailwind CSS, Bootstrap, GitHub, Rest API, MySQL, PostgreSQL, Figma, TypeScript, HTML, CSS, JavaScript, PHP.														
Soft Skills	: Problem Solving, Analytical Thinking, Attention to Detail, Adaptability & Fast Learner, Requirements Translation, Teamwork.														
Certification	: <table><tr><td>1. Belajar Pengembangan Aplikasi Android Intermediate, Dicoding</td><td>Jun 2024</td></tr><tr><td>2.
