SUMMARY

Adaptable Informatics graduate with hands-on experience in Full-Stack Web Development. Strong expertise in backend engineering using Laravel and MySQL, demonstrated through the development of complex management systems for government and healthcare sectors. Proficient in modern frontend ecosystems, utilizing Next.js, React, and Tailwind CSS to build responsive, high-performance user interfaces. Committed to writing clean, maintainable code and continuously learning new technologies to deliver scalable digital solutions.

EDUCATION

Diponegoro University

Semarang - Indonesia

Bachelor of Informatics | GPA: 3.14 / 4.00

August 2021 – August 2025

- Relevant Coursework: Software Engineering, Software Architecture Design, Basic Programming, Data Structures, and Computational Mathematics.
- Focus: Web-based application development and technical computer science fundamentals.

WORK EXPERIENCE

Independent Midwife Practice | Bidan Delima

Tegal - Indonesia

Full-Stack Web Developer | Intern

April 2025 – August 2025

- Developed a web-based application to facilitate patient management and Electronic Medical Records (EMR).
- Assisted in managing and digitizing patient data to improve administrative efficiency.

Master of Information Systems | Diponegoro University

Semarang - Indonesia

Web Developer | Intern

February 2025 – April 2025

- Updated and maintained the department website using WordPress technology.
- Collaborated with cross-functional teams to enhance project delivery and website performance.

Ministry of Investment | BKPM.

Jakarta Selatan - Indonesia

Software Engineer | Intern

January 2024 – February 2024

- Built a web-based application for office guard management to improve the efficiency of personnel monitoring.
- Implemented the solution using Laravel technology to streamline internal office operations.

COURSES & CERTIFICATIONS

Belajar Pengembangan Aplikasi Android Intermediate | Dicoding

June 2024

Oracle Primavera P6 Professional Project | Oracle Academy

April 2024

Memulai Dasar Pemrograman untuk Menjadi Pengembang Software | Dicoding

February 2024

Database Programming with SQL | Oracle Academy

March 2023

PL/SQL Database Programming | Oracle Academy

May 2023

UI-UX | Build with Angga

August 2022

Diponegoro Big Data School | Diponegoro University

November 2021

SKILLS

- | | | | |
|------------|----------------|--------------|--------------|
| • Laravel | • Tailwind CSS | • MySQL | • HTML |
| • Node.js | • Bootstrap | • PostgreSQL | • CSS |
| • React.js | • GitHub | • Figma | • JavaScript |
| • Next.js | • Rest API | • TypeScript | • PHP |

PROJECTS

Nihloh Coffee & Eatery Landing Page

- Developed a high-performance landing page using Next.js and TypeScript, ensuring strong type safety and code maintainability.
- Implemented a fully responsive UI/UX with Tailwind CSS, optimizing the layout for mobile and desktop users.
- Focused on performance optimization and SEO structure to enhance the digital presence of the F&B business.
- Live Demo: nihlohcafe.vercel.app

Architech Portfolio Platform

- Engineered a dynamic portfolio platform utilizing Next.js (React Framework) with TypeScript for a robust and scalable architecture.
- Designed modular and reusable React components to streamline development and future updates.
- Deployed via Vercel with continuous integration, ensuring seamless updates and high availability.
- Live Demo: architech-portofolio.vercel.app

Noiia Studio - Creative Agency Website

- Engineered an immersive digital experience for a creative studio using Next.js and TypeScript, ensuring a robust and type-safe codebase.
- Crafted a pixel-perfect, minimalist user interface with Tailwind CSS, focusing on smooth interactions and modern aesthetics.
- Optimized image rendering and layout shifts (CLS) to deliver a high-performance portfolio showcase with excellent SEO scores.
- Live Demo: noiia-studio.vercel.app

Office Sentry Web Based Application

- Office Sentry is a comprehensive management system designed to enhance the operational efficiency of office boys within an organization.
- Implemented the solution using Laravel and Tailwind CSS technology to streamline internal office operations

Electronic Medical Records (EMR) Web-Based Application

- The system was developed using the Laravel framework and MySQL database, with key features including patient data management, medical record entry, prescription and billing generation, and multi-format report printing.
- System testing was conducted using the Black Box method to ensure all functions meet user requirements.

UI / UX Design with Figma: Build E-Wallet Apps

- Designed a complete E-Wallet mobile app UI/UX from scratch using Figma, applying user-centered design principles.
- Developed a strong understanding of UI/UX fundamentals, including user flow, layout hierarchy, and usability best practices.
- Built a portfolio-ready project under the guidance of an experienced mentor, focusing on real-world UI/UX implementation.
