About Me

Full-Stack Web Developer with an Informatics degree, specialising in Laravel + MySQL back ends and REST APIs paired with Next.js/React front ends. I've shipped production systems across healthcare, government, and retail including an Electronic Medical Record platform and a multi-outlet ERP/POS I built and maintain solo under 1,000+ automated tests. I work AI-assisted, and verify what AI writes before it ships.

Education

Diponegoro University Aug 2021 – Aug 2025
Bachelor of Informatics
GPA: 3.14 / 4.00
Research Thesis**:** Development of a Web-Based Electronic Medical Record Management System Application Using the ICONIX Process Method (Case Study at Delima Midwife Independent Practice).

Working Experiences

Software Engineer Intern, Ministry of Investment BKPM Jan 2024 - Feb 2024
- Built a web-based application for office guard management to improve the efficiency of personnel monitoring.
- Office Sentry is a comprehensive management system designed to enhance the operational efficiency of office boys.

Software Engineer, PT Lumen Evolution Technology (Work From Anywhere) Aug 2025 - Oct 2026
- Delivered web applications for various clients as part of a two-person remote team. One of our projects was the video editing academy "Sector Ngedit," which featured a Golang-based REST API and a PostgreSQL database, a front-end interface built with React/TypeScript, Midtrans payment integration with webhook verification, and the migration of a WordPress site hosting over 12,000 members without requiring any users to reset their passwords.

Project Experiences

School Management System, SMK Al-Musyaffa Jan 2026 - Mar 2026
- Built a Laravel 12 school management system with role-based access, real-time barcode attendance, automated Excel/DomPDF reporting, and a full audit trail for data integrity.

Learning Management System Video Editing, Sector Ngedit May 2026 - Aug 2026
- Built a custom LMS platform using React, TypeScript, Golang, and PostgreSQL. serving 12,000+ members with a product marketplace, Midtrans-integrated checkout & coupon system, 3-column LMS player, admin analytics dashboard, and WordPress data migration without forced password resets, replacing the legacy WordPress system with a high-performance, scalable solution.

Multi-Outlet ERP & POS System, Robeena Health & Beauty Care Aug 2026 - now
- Built and solo-maintain a Laravel 13 + MySQL ERP/POS with a REST API and Next.js front end for a multi-outlet clinic and B2B partner network, with per-branch pricing, rule-driven commission & payroll engines, PDF/Excel reporting, 6-role audit trail, and 1,000+ automated tests; developed AI-assisted.

Additional Information

Technical Skills : Laravel, Node.js, React.js, Next.js, GoLang, Tailwind CSS, Bootstrap, GitHub, Rest API, MySQL, Figma, TypeScript, HTML, CSS, JavaScript, PHP, Go.

Soft Skills : Problem Solving, Analytical Thinking, Attention to Detail, Adaptability & Fast Learner, Requirements Translation, Teamwork, AI-Assisted Engineering.

Certification :
1. Oracle Primavera P6 Professional Project, Oracle Academy — Apr 2024
2. Database Programming with SQL, Oracle Academy — Mar 2023
3. PL/SQL Database Programming, Oracle Academy — May 2023
